2 Platform Supported

The software is supported on the platforms listed below:

Windows	Windows 7/8/10/11 (64 bits) Windows XP (32 bits)
Linux	Centos 6.8/7.0/7.5 (64 bits) Ubuntu 18.04/20.04 LTS

3 Ports

Port No.	Port Type	Port Description
36545	User-defined protocol port	Used for GAO (Gowin Analyzer Oscilloscope) display communicating with Jtag server.
36546	User-defined protocol port	Used for GAO (Gowin Analyzer Oscilloscope) display communicating with Jtag server.

4 Documents

The released documents are listed in the table below and the PDF versions are packaged in the installation directory.

5 Known Problems

The following problems apply to the supported functions in Gowin Software.

GAO Capture Signal Failure

Solution: Try to reduce the number of capture signals and capture depth. If the problem still exists, please contact GOWINSEMI technical support.

GAO PnR Failure

ERROR (PR1011): Failed to capture GAO signal<name>, because there's no wire to route for the signal.

Solution: Check whether the signal is hard-wired, such as the output of IOLOGIC.

The information output pane displays messy code in Ubuntu 18.04 LTS system

The information output pane displays messy code in Linux; but when the content is copied and pasted to the code editing pane, the display is normal.

Solution: Delete `ide/lib/libfreetype.so.6`, so that the software uses the library that comes with the user's computer system.
